

ONGOING INSPECTIONS

PURPOSE: To establish and maintain regularly scheduled Health & Safety Inspections, to identify and

correct unsafe working conditions and unsafe work practices to prevent the development

of unsafe conditions and practices, and to promote a safer working environment.

RESPONSIBILITY: Management, who is responsible for the daily operation of the site, is also responsible for

this policy.

DEFINITION: This Policy details the requirements for a planned structure that results in frequent Health

& Safety Inspections.

GENERAL: The following list of inspections is contained in this policy:

1. MANAGEMENT INSPECTIONS

2. EMPLOYEE INSPECTIONS

3. UNANNOUNCED WORKPLACE SAFETY OR OCCUPATIONAL HEALTH & SAFETY

INSPECTIONS

4. SPECIAL INSPECTIONS FOLLOWING AN INCIDENT OR ACCIDENT.

TRAINING: There is on-site training available to all employees on how to do a proper inspection and

the frequency of those inspections. We also provide outsourced training through AASP for

Managers & Supervisors.

MANAGEMENT INSPECTIONS

Managers are to conduct worksite tours at least monthly and to sign off on inspections that they have delegated.

Inspection Purpose

- To review, firsthand, the prevailing working conditions and work practices at the time of inspection; to identify specific Health and Safety concerns, and to assess the effectiveness of the Health and Safety program.
- Demonstrate support for the Health & Safety Program and the welfare of all employees.
- Management must record inspection comments and findings and promptly act on all issues as required. An Opportunity Report (see figure 7) should be filled out and assigned appropriately for all deficiencies noted.
- The onsite inspection of rigs and crews at the prime licensee site by Swab Master Ltd. management shall be done randomly with no notification.
- The Shop will be inspected by the General Manager, HS Representative, Assistant Manager or the Mechanic and will be documented.
- The Office will be inspected on a quarterly basis by the Office Manager or their designee and will be documented.

See Figure 1 & Figure 2

SUPERVISORS AND WORKER INSPECTIONS

During daily operations employees are required to perform an inspection every time the Derrick is raised in the air as per the guidelines provided by Kodiak Engineering.

Supervisors and Workers are to ensure all deficiencies are identified and if possible corrected by the employee. If a deficiency cannot be corrected on site, an Opportunity Report (figure 7) should be filled in and submitted to a Manager or the office as soon as possible. Employees are to ensure the equipment and PPE is in proper state prior to use.

If the employee does not understand his role or responsibility in conducting the inspections, they are to ask for assistance.

Supervisors and Workers are required to perform:

- Drivers Vehicle Inspection & Trip Report (part of the daily log)
- See Figures 3, 4, 5 & 6
- Rig Manager Inspection on equipment and crew once weekly
- RP 3.0 Level I & II completed by a Rig Supervisor when the derrick of the swab unit is raised.
- Pre Job Safety Meetings / Field Site Inspections

Figure 3: Drivers Daily Log / Drivers Vehicle Inspection & Trip Report. To be completed by all Supervisors and Workers on a daily basis. Drivers Daily Log to be completed every day, Driver's Vehicle Inspection to be completed when working only and following guidelines as per Alberta Transportation Regulations.

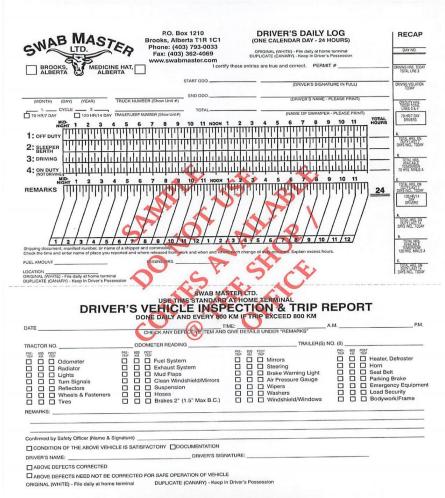

Figure 4: Rig Manager / Supervisor Inspection Form, completed weekly on the Supervisors equipment and crew.

UNANNOUNCED WORKPLACE SAFETY OR OCCUPATIONAL HEALTH & SAFETY INSPECTIONS/AUDITS

Management responsible for the day-to-day operations of the company and or his designee will accompany the outside inspector.

Inspection Purpose

- To ensure knowledgeable management persons accompany inspectors arriving on site unannounced from outside government agencies such as Occupational Health and Safety, etc.
- Management shall keep notes during the inspection and arrange for the prompt correction of deficient conditions found by an inspector in the area.
- Management shall review the inspectors report, determine appropriate inspection report responses, and issue compliance letters where required. These letters shall be forwarded to the agencies.
- Copies of inspection reports shall be maintained on file along with the compliance letters and copies shall be posted in accordance with agency regulations where applicable.

INSPECTIONS FOLLOWING AN INCIDENT/ACCIDENT

Composition

The inspection team will consist of the following persons:

- a) The General Manager and/or Assistant Manager and the HS Representative of Swab Master Ltd.
- b) Employee/employees involved in the incident/accident
- c) Other persons as directed by Occupational Health and Safety regulations where applicable.

Inspection Purpose

- To preserve life and property.
- Prevent further incidents, damage, injury, or other similar downgrading incident.
- Preserve evidence at the accident scene (where applicable, for police, Occupational Health and Safety, etc.)
- Render conditions at the scene safe and harmless.
- Notify those persons where applicable in accordance with Emergency Response policy.
- Determine root causes of incident or accident, and initiate prompt remedial action to prevent similar incidents.
- Conduct a detailed accident/incident investigation and complete required accident/incident report.
- Distribute the accident/incident report to necessary organizations and individuals.

PROCESS AND SCHEDULING

The purpose of an inspection is to:

- Identify existing workplace hazards
- Identify potential workplace hazards
- Reinforce and promote safe work practices
- Identify Company policy and procedure violations
- Monitor control mechanisms
- Ensure corrective measures have been implemented
- Confirm training was effective
- Identify possible training initiatives

Inspections are not done to find mistakes and point fingers but to prevent incidents or accidents and are used as a learning tool for everyone.

Informal inspections are an observation done on a daily basis. An Opportunity Report (Figure 7) should be completed if they show us the following:

Identifying Unsafe Acts

- a) Failure to warn
- b) Working at unsafe speeds
- c) Making safety devices inoperative
- d) Using unsafe equipment or not using equipment in a safe manner
- e) Unsafe loading, placing, mixing etc.
- f) Unsafe positions or postures
- g) Working on moving or dangerous equipment
- h) Horseplay
- i) Failure to use safe attire or PPE

Identifying Unsafe Conditions

- a) Improper guarding
- b) Defective Material
- c) Hazardous arrangements and storage
- d) Improper illumination
- e) Improper ventilation
- f) Unsafe dress and apparel
- g) Unsafe design or construction
- h) Unguarded

The following table identifies each type of inspection we complete at Swab Master Ltd. and how frequently that inspection should occur.

DAILY	WEEKLY	MONTHLY	QUARTERLY	ANNUALLY
Drivers Vehicle	Rig Manager /	Rig & Tank Manager	Office Inspection	Safety Program
Inspection*	Supervisor Inspection	Inspection	Office hispection	Inspection
Pre-Job Safety				Hazard Matrix
Meeting (Field Site		Shop Inspection		Review & Inspection
Inspection) *				Review & Ilispection
Derrick Inspection *				

^{*}If required. If the workers and equipment are not "working" that day, then the inspection is not done.

PROCEDURE:

- 1. Complete your inspection as per the training you were given.
- 2. Identify existing or potential hazards, unsafe work practices, faulty equipment, etc.
- 3. After identification of faults, errors or hazards has been made, fill out an Opportunity Report and submit it to your manager or the office.
- 4. Submit your inspection report to the office for management approval & follow up.

Figure 7: Opportunity Report. Used to report, track and complete defects or faults. These reports are tracked by the coding on the bottom right-hand side. Do not use duplicated forms. Safety issues, hazard identification, process errors, vehicle defects, vehicle maintenance needed, tool defects or maintenance, document errors, shop problems or training deficiencies should all be reported on this form. It is imperative that this form is submitted as soon as possible so follow up and correction of an issue can be completed in a timely manner.
